Nature Tells You

As Many a Barre Reader Knows Too Well

When the kidneys are weak, Nature tells you about it. The urine is nature's index. Infrequent or too frequent passage.

Other disorders suggest kidney ills.

Doan's Kidney Pills are for disordered kidneys.

Barre people testify to their worth.

H. J. Ennis, barber, 11 S. Main street, Barre, Vt., says:

"Some time ago I used Doan's Kidney Pills and they proved to me, that what I had often read about them in the papers, was true. When I began to have trouble with my kidneys, I got Doan's Kidney Pills right away, as others of my family had had great benefit from them. I had sharp pains across the small of my back. I used Doan's Kidney Pills and the pain was driven away. I have had no trouble since. It is a pleasure for me to recommend Doan's Kidney Pills."

For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

CONSTIPATION OR COMFORT?

There can be neither comfort nor good health where constipation exists. Most people suffer from this cause at intervals, many are chronic victims.

Strangely enough, the old-time remedies for this very common complaint were nauseating doses and so powerful that they often made the condition worse than before. Then they were out in their effect so that it was necessary to take a larger and larger dose. The first attempts at improvement sought to make the dose more palatable but to disguise the taste the size was increased and results were unsatisfactory.

In this age of progress it was impossible that doses resembling horse medicine should continue to be taken by human beings. In the new laxative, Pinklets, is presented a dainty, sugar-coated pill, hardly larger than a grain of mustard, that is free from unpleasant effects, does not upset the stomach nor gripe but simply gives nature the needed assistance. Pinklets also assist digestion and are good to take after a full meal. Once use Pinklets and you will never return to salts, oil and harsh purgatives.

Your own druggist can supply you with Pinklets or they will be sent by mail, postpaid, by the Dr. Williams Medicine Co., Schenectady, N. Y., at 25 cents per bottle. Send for helpful pamphlet.

APPLY SULPHUR IF SKIN BREAKS OUT SULPHUR DRIES UP ECZEMA USE LIKE COLD CREAM TO STOP ITCHING

Any breaking out or irritation on the face, arms, legs or body when accompanied by itching, or when the skin is dry and feverish, can be readily overcome by applying a little bold-sulphur cream, says a noted dermatologist.

He informs us that bold-sulphur instantly allays the angry itching and irritation and soothes the skin clear and smooth. Bold-sulphur has occupied a secure position for many years in the treatment of cutaneous disorders because of its parasite-destroying property. Nothing has ever been found to take its place in treating the irritable

and inflammatory skin affections. While not always establishing a permanent cure, it never fails to subdue the itching irritation and drive the eczema away and it is often years later before any eruption again appears on the skin. Those troubled should obtain at any pharmacy an ounce of bold-sulphur cream, which is applied to the affected parts in the same manner as an ordinary cold cream. It isn't unpleasant and the prompt relief afforded, particularly in itching eczema, proves very welcome.

SPORTSMEN'S AID SOUGHT.

Against Forest Fires in Lumber Regions of Northwest.

Because of the fact that many forest fires are set through the carelessness of hunters, campers, and others who go into the woods for recreation, the forest service has taken up with manufacturers of firearms and ammunition the question of a co-operative arrangement through which purchasers and users of guns and cartridges shall be reminded of the fire danger.

It has been pointed out that in the lumber regions of the northwest, for example, manufacturers and other business men have been having printed or stamped on their stationery and pay checks various crisp, catchy statements about the loss which the public suffers through the decreased demand for labor and decreased money in circulation if timber, which is the source of many of the northwest's industries, is burned up.

It has also been pointed out that in the east particularly many forest fires are started by the carelessness of hunters, who drop burning matches, cigar or cigarette stumps, or pipe coils in the woods, or perhaps build a fire which is left burning when the hunter goes on. Forest fires of course greatly injure the interests of sportsmen by robbing the birds of their proper cover. They also impair the food supply of both birds and big game, through the destruction of the undergrowth which furnishes browse, berries, and other food.

The eastern woods are exposed to the danger from fires principally in the spring and fall, when most of the trees are bare and the leaves on the ground are dry. The spring fires, of which there are due to trout fishermen, may destroy the eggs of game birds and even the young birds themselves. Since trout fishermen are likely to hunt in the fall, the same individuals, if careless, may be a source of danger at both seasons.

It is suggested that the manufacturers of arms and ammunition ought to be sufficiently interested in the matter of perpetuation of game to be willing to help in the campaign against forest fires. This help may come through the printing of some brief fire warning on cartridge boxes or some slip to go with

any hunting or camping supplies which are furnished. Several manufacturers have already expressed their interest in the matter and their willingness to help.

Co-operative Laundry for Farmers.

The following is taken from the current issue of Farm and Fireside:

"The farmers about Chatfield, Minn., have been running a co-operative neighborhood laundry for some years. It is a success. It is run in connection with a co-operative creamery from which it gets its power. Building and machinery for the laundry cost \$4,500. The receipts for the first year were \$5,403, of which seventy per cent. went for wages. Those bringing their washing to the plant had ten per cent paid back in a patronage dividend, and the stockholders got a six-per-cent dividend. No more washdays out there!"

THAT CEMENTED PATCH

The cemented patch is but a very unreliable makeshift—have the puncture repaired RIGHT here by STEAM VULCANIZING. STEAM VULCANIZING cures the rubber right—it DOESN'T sap the life out of the rubber like the dry heat of electric or gasoline vulcanizing.

The puncture repaired here is a puncture that will NEVER bother you again. The cost is nominal and service prompt.
